**EEC Career Ladder for Family Child Care Homes and Center-based Early Education and Out of School Time Programs 5-12-11**

**EEC is not mandating the use of this Career Ladder by early education and OST programs. Many programs already have a ladder that meets their needs. This ladder is intended as:**

A **resource across EEC’s mixed delivery system that:**
- Articulates how increasing responsibility aligns with greater knowledge and skills (competency) and professional advancement;
- Establishes a common starting point for work on more refined pathways like a career lattice;
- Provides a frame to address compensation and other broad issues that affect our entire workforce.

A **reference that programs and educators can use to:**
- Develop a career ladder that is specific to their program;
- Assess and improve a ladder that already exists;
- Map intentional professional growth for educators;
- Plan professional development for different levels of responsibility;
- Aid supervisors and directors as they guide and mentor staff.

**Important notes:**
1. This basic first version is a common starting point to build upon. It will evolve and develop as educators gain experience with it and grow professionally.
2. This ladder includes only educators who work directly with children and families and supervisory positions that support the professional development of other educators. It does not address administrative functions or other positions.
3. Position Titles and Certifications have been omitted intentionally at this stage of the ladder’s development. The goal is to define responsibilities that cut across early education and out of school time settings rather than tying these and other elements to an identified position or credential.
4. Educators can enter the ladder at any level that they qualify for whether they work in a home-based or center-based setting.
5. The responsibilities identified at each level may look different in different types of care but they require the same underlying skills. An educator at the Leadership Level in center-based care is likely to provide other educators in the program with formal supervision. Her Leadership Level counterpart in family child care may fulfill these same responsibilities in the context of a family child care system or educator support group.
6. Although this ladder reflects some licensing requirements and some QRIS standards, it is not intended to align with either of these. Please refer to the definitions and clarifications on page 5 for more information.

**EEC Core Competency Areas**
1. Understanding the Growth and Development of Children and Youth
2. Guiding and Interacting with Children and Youth
3. Partnering with Families and Communities
4. Health, Safety, and Nutrition
5. Learning Environments and Implementing Curriculum
6. Observation, Assessment, and Documentation
7. Program Planning and Development
8. Professionalism and Leadership

### EEC Core Competency Areas

1. Understanding the Growth and Development of Children and Youth
2. Guiding and Interacting with Children and Youth
3. Partnering with Families and Communities
4. Health, Safety, and Nutrition
5. Learning Environments and Implementing Curriculum
6. Observation, Assessment, and Documentation
7. Program Planning and Development
8. Professionalism and Leadership
**Professional Development as Defined in this Ladder**

- Education results in college credits approved CEUs, recognized credentials or equivalents.
- Competency based training includes theory, practice, observation, and reflection.
- Competency based training is measured in contact hours.
- Related degrees or certificates may include competency development in the specified areas. If the degree or certificate is unrelated, competency development in these areas is required in addition to the degree or certificate.

**Continuing Education:** Professional development that advances an educator’s professional growth with the intent of helping the educator move up the ladder.

**Experience:** Providing direct care and instruction to children during all types of program activities for a minimum of 12 hours per week. Qualifying experience includes regular observation by, and consultation with, a more qualified educator from the Independent Level or above. Observations and consultations must be recorded in the educator’s IPDP.

**IPDP** is an Individual Professional Development Plan. An IPDP is used to plan and record an educator’s professional growth.

**In-service Training:** Intentional, on-going professional development and training to meet established requirements and to increase competency within a given level of responsibility. Often includes ongoing, formative observation and feedback by a supervisor or qualified peer. At a minimum, in-service must meet the number of hours required by the EEC regulations.

**Mentoring:** Activities by which a more experienced educator guides and supports the professional growth of another educator

**Related Fields of Study:** For early education: Child care, child development, health care, child psychology, social work, or the provision of direct services to children and their families. For school age child care: all the preceding fields and early childhood education, elementary education, recreation, physical education, human services, or the arts.
